About us

Our company has over 20 years of experience in the production of security systems. We are one of the leading producers in the world in the field of manufacturing sliding and folding gates as well as road barriers.

We provide the highest quality gates, barriers and a whole range of products related to access control, in particular for facilities of strategic importance, such as military units, embassies, central banks, oil refineries and many others.

Providing systems for an individual investment project is also our specialty. We have the most experience in this in Poland, because we have completed hundreds of such projects around the world.

The products we make are hot-dip galvanized and powder painted in a professional paint shop. All this to maintain excellent quality for many years.

Each of our product design originated from the industry and the military use prototypes, where 24-hour continuous work and high quality is required. In result, our products ensure high work culture for every use even for in home solutions and for small businesses.

Quality confirmed by reach ...

We are present all over the world. Our products have been repeatedly appreciated by the global industrial market, as well as for the individual investors.

We export our equipment to many countries, such as:

- England
- Algeria
- Saudi Arabia
- Denmark
- Egypt
- France
- Finland
- Greece
- Ireland
- Kuwait
- Macedonia
- Mexico
- Moldova
- Germany
- Nigeria
- Norway
- Portugal
- Singapore
- Scotland
- Italy

SLIDING GATES

www.bk-securitysystems.com | E-mail: export@bk-securitysystems.com | Tel: +48 530 857 007

CANTILEVERED SLIDING GATES

The most popular model among the entire family of sliding gates

TECHNICAL DATA:

- The maximum entry width of the SLIDER L model is 9.0m (80x80x5 running rail)
- The maximum entry width of the SLIDER XL model is 20.0m (WELSER rail)
- Maximum gate height for both models is 3.0m (higher available on request)
- Standard infill - 25x25 closed profile

EQUIPMENT:

- Drive unit - FAAC / BFT / BENNICA
- Main power 1x230VAC / 50Hz or 3x400V / 50Hz
- Key switch OPEN-STOP-CLOSE
- EMERGENCY STOP
- Photocells
- Safety edges set (SENTIR SAFETY EDGES)
- FAAC LIGHT or ROTO-LAMP beacon

CANTILEVERED TELESCOPIC GATES

A functional solution that saves space

TECHNICAL DATA:

- We avoid the obligation to maintain surface rails due to the self-supporting construction
- The maximum entry width is 10.0m (80x80x5 running rail + WELSER rail)
- The maximum height of the gates is 3.0m
- Standard infill - 25x25 closed profiles

EQUIPMENT:

- Drive unit - FAAC / BFT / BENNICA
- Main power 1x230VAC / 50Hz or 3x400V / 50Hz
- Key switch OPEN-STOP-CLOSE
- EMERGENCY STOP
- Photocells
- Safety edges set (SENTIR SAFETY EDGES)
- FAAC LIGHT or ROTO-LAMP beacon

TRACKED TELESCOPIC GATES

The perfect solution for 24/7 intensive operation

TECHNICAL DATA:

- The maximum entry width is 25.0m (S10 track rail)
- The maximum height of the gates is 4.0m
- Standard infill - 25x25 closed profile

EQUIPMENT:

- Drive unit - FAAC / BFT / BENNICA
- Main power 1x230VAC / 50Hz or 3x400V / 50Hz
- Key switch OPEN-STOP-CLOSE
- EMERGENCY STOP
- Photocells
- Safety edges set (SENTIR SAFETY EDGES)
- FAAC LIGHT or ROTO-LAMP beacon

JETGATE – AIRPORT GATES

Uncompromising entry width up to 120m!

TECHNICAL DATA:

- The maximum entry width is 120.0m (on 2xS10 rails)
- Standard infill – panel D656 (6mm double wire + 5mm single wire)

EQUIPMENT:

- Drive unit – gear motor, power depends on the gate leaf dimensions
- Main power supply 3x400V / 50Hz – 60Hz
- Key switch OPEN-STOP-CLOSE
- EMERGENCY STOP
- Infrared barriers (long range photocells)
- Safety edges set (SENTIR SAFETY EDGES)
- Airport or individual warning lights
- Control panel

CUSTOM SLIDING GATES

Uncompromising solutions for uncompromising

TECHNICAL DATA:

- The maximum width of the entrance is set individually
- Maximum height of gates is set individually
- Infill to be determined by customer

EQUIPMENT:

- Drive unit - engine with gear on request or serial drive
- Main power supply 24VDC / 1x115V / 1x230V / 3x400V
- Key switch OPEN-STOP-CLOSE
- EMERGENCY STOP
- Photocells
- Safety edges set (SENTIR SAFETY EDGES)
- Warning lights (any)
- Any type of control type (desktop, code lock, vehicle number scanner, etc.)

BI-FOLDING and SWING GATES

www.bk-securitysystems.com | E-mail: export@bk-securitysystems.com | Tel: +48 530 857 007

BI-FOLDING GATES

An effective solution for investors who value space and functionality

TECHNICAL DATA:

- The maximum width of the entrance is 9.0m
- Maximum gate height - 4.0m
- Standard infill - 25x25 profile or be determined by customer

EQUIPMENT:

- Drive unit - ELKA ZENIT-S / FAAC 391
- Main power supply 230VAC / 50Hz
- Key switch OPEN-STOP-CLOSE
- EMERGENCY STOP
- Photocells
- Safety edges set (SENTIR SAFETY EDGES)
- Warning lights (any)
- Any type of control type (desktop, code lock, vehicle number scanner, etc.)

BIFOLDING SPEED GATES

An effective solution for investors who value space and functionality

TECHNICAL DATA:

- The maximum width of the entrance - 8.0m
- Maximum gate height - 3.5m
- Standard infill - 25x25 profile or be determined by customer

EQUIPMENT:

- Drive unit - RAPTOR PLC DRIVE
- Main supply 1x230VAC or 3x400VAC
- Key switch OPEN-STOP-CLOSE
- EMERGENCY STOP
- Photocells
- Safety edges set (SENTIR SAFETY EDGES)
- Warning lights (any)
- Any type of control type (desktop, code lock, vehicle number scanner, etc.)

CLASSIC SWING GATES

Quality and classic at its best

TECHNICAL DATA:

- The maximum width of the entrance - 10.0m
- Maximum gate height - 4.0m
- Standard infill - 25x25 profile or be determined by customer

EQUIPMENT:

- Drive unit - FAAC / BFT / BENNINCA
- Main supply 1x230VAC or 3x400VAC
- Key switch OPEN-STOP-CLOSE
- EMERGENCY STOP
- Photocells
- Safety edges set (SENTIR SAFETY EDGES)
- Warning lighting (any)
- Any type of control type (desktop, code lock, vehicle number scanner, etc.)

PEDESTRIAN GATES / WICKETS

Quality and safety available to everyone!

TECHNICAL DATA:

- The maximum width of the entrance - 2.0m
- Maximum gate height - 4.0m
- Standard infill - 25x25 profile or any to be determined by customer

EQUIPMENT:

- Door handle + lock
- Ears to padlock
- Additional horizontal or vertical drop bolt
- Door closer
- Electro-hook
- Magnetic lock (SHEARLOCK)
- Additional gap curtains (army, airports, highly guarded facilities)

ROAD BLOCKERS

www.bk-securitysystems.com | E-mail: export@bk-securitysystems.com | Tel: +48 530 857 007

ROAD BLOCKER TITAN

UNCOMPROMISE SAFETY

TECHNICAL DATA:

- Maximum entry width for a single blocker - 6.0m (standard is 3.0m)
- Blocking height from 650mm to 1200mm (standard is 665mm)
- Protection at K4 / K8 / K12 level. Optional K30 (military applications)
- Standard lifting / lowering time 4-6s (special version 1.5s)
- Hot-dip galvanized construction, Front plate additionally powder coated.
- Hydraulic control cabinet with separated PLC case.

EQUIPMENT:

- Guard control panel
- Manual hydraulic pump
- LED warning light
- Possibility of integration with any object management system
- Possibility of any control (remote control, desktop, license plates, RFID card)

ROAD BLOCKER SHIELD

UNCOMPROMISE SAFETY

TECHNICAL DATA:

- Maximum entry width for a single blocker - 6.0m (standard is 3.0m)
- Blocking height from 650mm to 1200mm (standard is 665mm)
- Protection at K4 / K8 / K12 level. Optional K30 (military applications)
- Standard lifting / lowering time 4-6s (special version 1.5s)
- Hot-dip galvanized construction, Front plate additionally powder coated.
- Hydraulic control cabinet with separated PLC case.
- Shallow underground installation

EQUIPMENT:

- Guard control panel
- Manual hydraulic pump
- LED warning lights
- Possibility of integration with any object management system
- Possibility of any control (remote control, desktop, license plates, RFID card)

TYRE KILLER DEFENDER

UNCOMPROMISE SAFETY

TECHNICAL DATA:

- Maximum entry width for a single blocker - 6.0m (standard is 3.0m)
- Degree of protection calculated at level K4
- Standard lifting / lowering time 4-6s (special version 1.5s)
- Hot-dip galvanized construction, powder coated teeth
- Hydraulic control cabinet with separated PLC case.
- Tooth thickness 20mm / 25mm (depending on version)

EQUIPMENT:

- Guard control panel
- Manual hydraulic pump
- Possibility of integration with any object management system
- Possibility of any control (remote control, desktop, license plates, RFID card)

ROAD BLOCKER MONOBLOCK

PERFECT SPACING

TECHNICAL DATA:

- The width of a single block is 400mm
- Blocking height 600mm
- Degree of protection calculated at K4
- Lifting / lowering time from 1.5s to 4.0s
- Hot-dip galvanized construction, additional powder coated cover
- Hydraulic control cabinet with separated PLC case.
- It is possible to install from 1 to 4 blockades from one hydraulic cabinet

EQUIPMENT:

- Guard control panel
- Manual hydraulic pump
- LED warning lamps
- Possibility of integration with any object management system
- Possibility of any control (remote control, desktop, license plates, RFID card)

STANDARD AND ANTI-RAM ARM BARRIERS

ARM BARRIER FAAC 620

HYDRAULIC RELIABILITY AND PERFECT ECONOMICS

TECHNICAL DATA:

- Maximum entry width for a single barrier - 5.0m (standard 4.0m)
- Barrier arm length from 1.0 m to 5.0 m (depending on the shape of the arm)
- Hydraulic drive with the possibility of locking in the open and closed position
- Opening times from 3.5 s to 4.5 s; for Rapid version from 2 s to 3 s (broken arm)
- Recommended for places with high traffic but not continuous
- Automatic, semi-automatic, parking, residential or home applications
- Triangle key unlocking, BUS technology and two-channel loop detector

EQUIPMENT:

- Control panel
- Barrier body for rectangular, oval or swinging arms
- Hydraulic drive with spring
- Mounting accessories
- Triangular key

ARM BARRIER FAAC 640

IDEAL SOLUTION FOR THE ESTATE AND INDUSTRY

TECHNICAL DATA:

- Maximum entry width for a single barrier - 7.0m (standard 4.0 m)
- Barrier arm length from 4.0m to 7.0m
- Hydraulic drive with the possibility of locking in the open and closed position
- Opening time 4.0 s for a 5.0m standard arm (arm deceleration)
- The possibility to transfer the status of the barrier to traffic management devices
- Intended for industrial applications, heavy traffic entrances
- External lock with key, BUS technology and built-in two-channel detector

EQUIPMENT:

- Control panel
- Barrier post case
- Hydraulic drive with spring
- Mounting accessories
- Triangular release key

ARM BARRIER FAAC B680H

UNCOMPROMISING SOLUTION

TECHNICAL DATA:

- Arm length from 2.3 m to 8.3 m
- Removable housing in red (blue, white, gray, stainless steel)
- Hybrid technology: hydraulics and brushless motor (BLDC)
- Opening time 1.5 s (2,000 mm arm) to 6,0 s (8,000 mm arm) electronically selected
- "Eternal" spring - 2 million cycles of continuous operation without special maintenance
- Easily programmable with an advanced control panel
- Integrated LED lighting, built-in two loop sensors and Master / Slave logic

EQUIPMENT:

- Barrier with control panel and encoder
- Hydraulic drive
- Mounting accessories
- Triangular unlocking key

ANTI-RAM ARM BARRIER DUAL HSAB**UNCOMPROMISING SECURITY****TECHNICAL DATA:**

- Maximum entry width - 7.0m (standard 3.0m)
- Degree of protection K4 / K8 / K12
- Standard lifting / lowering time 12s / 12s
- Hot-dip galvanized construction, powder coated arm
- Reflective red stripes
- Separated or integrated hydraulic control cabinet with electronics
- Single or double arm

EQUIPMENT:

- Guard control panel
- Manual hydraulic pump
- Possibility of integration with any object management system
- Possibility of any control (remote control, desktop, license plates, RFID card)

TYRE SPIKES

TYRE SPIKES TRAPEZOIDAL SPIKES

ECONOMIC AND EASY TO INSTALL

TECHNICAL DATA:

- Flat tooth, sharpened, profiled
- Blocking width from 1.0m to 8.0m (modular construction every 1.0m possible)
- Tooth height after opening = 55mm
- Height of hump = 55mm
- Body width = 400mm
- Hot-dip galvanized construction and optionally powder coated
- Gravity work or with automatic barrier
- Easy and quick surface installation
- Main shaft with ball bearings
- Load capacity = 7.5 tonnes per axle

EQUIPMENT:

- Locking screws in the lower position (only for gravity spikes)
- Springs for regulating lifting / rebound force

TYRE SPIKES TRIANGLE SPIKES

IDEAL FOR HEAVY USE

TECHNICAL DATA:

- Round, sharpened tooth with a diameter of 14mm
- Blocking width from 1.0m to 8.0m (modular construction every 1.0m possible)
- Tooth height after opening = 80mm
- Hump height = 80mm
- Body width = 500mm
- Hot-dip galvanized construction and optionally powder coated
- Gravity work or with automatic barrier
- Easy and quick surface installation
- Main shaft with ball bearings
- Load capacity = 11.5 tonnes per axle

EQUIPMENT:

- Locking screws in the lower position (only for gravity spikes)
- Springs for regulating lifting / rebound force

TYRE SPIKES UNDERGROUND SPIKES

BORDER CROSSINGS AND SPECIAL UNITS

TECHNICAL DATA:

- Round, sharpened tooth with a diameter of 16mm
- Blocking width from 1.0m to 8.0m (modular construction every 1.0m possible)
- Tooth height after opening = 100mm
- Body width = 350mm
- Hot-dip galvanized construction and optionally powder coated
- Gravity work or with automatic barrier
- Underground assembly
- Main shaft with ball bearings
- Load capacity max. 30 tons per axle

EQUIPMENT:

- Locking screws in the lower position (only for gravity spikes)
- Springs for regulating lifting / rebound force

FENCES

PANEL FENCES FOR HOME USE

QUALITY AND SAFETY

TECHNICAL DATA:

- The width of the panels is optional
- Custom height on request
- Galvanized and painted in standard RAL colors
- System assembly depending on type
- Posts to be concreted (optional on mounting foot)
- Optional with foundation
- Easy to assemble

PANEL FENCES FOR INDUSTRIAL USE**QUALITY AND SAFETY****TECHNICAL DATA:**

- The width of the panels is optional
- Custom height on request
- Galvanized and painted in standard RAL colors
- System assembly depending on type
- Posts to be concreted (optional on mounting foot)
- Optional with foundation
- Easy to assemble

PANEL FENCES D656 AND D868

QUALITY AND SAFETY

TECHNICAL DATA:

- Panels width 2.5m
- Heights from 830mm to 2030mm (optional height 2430mm for D868)
- Galvanized and painted in standard RAL colors
- Mounting of clamps
- Posts to be poured in concrete (optional on mounting foot)
- Optional with foundation
- Easy to assemble

STADIES AND SPORTS PLAYS

UNCOMPROMISE SAFETY

TECHNICAL DATA:

- Panels width 2.5m
- Height from 2000mm to 6000mm (combined panels)
- Galvanized and painted in standard RAL colors
- Mounting of clamps or hook bolts (strength)
- Posts to be poured in concrete (optional on mounting foot)
- Strong posts with thick walls.
- Easy to assemble

MILITARY AND SPECIAL USE FENCES**UNCOMPROMISE SAFETY****TECHNICAL DATA:**

- Top-class military fences
- Any execution in accordance with military standards
- Individual height on request
- Galvanized and painted in standard RAL colors
- System assembly depending on type
- Posts to be concreted (optional on mounting feet)
- Optional with foundation
- Easy to assemble
